TRADITION INNOVATION PASSION HISTORY

Company

Risport was founded in the 1970s in Montebelluna, the home of the Sportsystem. It immediately established itself as the leading brand in the world of skating due to its characteristic elegance, performance and capacity for innovation.

The world's best skaters wear Risport to compete in all the highest-level competitions, obtaining excellent results.

Since 1995, Risport has been part of the Rossignol Group, a world leader in winter sports. From its headquarters in Montebelluna, Risport continues to be the go-to brand for high-level skaters and all those who want to compete, with its world-class products born from cutting-edge technological research without betraying over 50 years of style.

At the heart of Rossignol Group's Mission

For many years, we have been seeking and applying solutions to the challenge facing today's world: how to balance the economic aspects to support our businesses and employees while simultaneously minimizing our environmental impact.

We are working constantly to achieve economically effective, socially fair and environmentally sustainable development involving all the brands of our group.

Producing our products while respecting the environment in terms of materials and production processes.

Helping to protect the local area and the communities that keep it alive.

The Respect programme

The Rossignol group is taking environmental challenges to heart and is committed to taking concrete actions to protect its playing field.

If you want to learn more about the respect program,
please visit rossignol.com/gb-en

HOW TO CHOOSE THE CORRECT BOOT

Risport skates are handcrafted and tested to guarantee the best performance and maximum comfort. This technical perfection originates from ongoing technological innovation and attention to details so that the final product is a balanced combination of lightness and strength, modernity and elegance.

Quality is an essential element for Risport. The achievement process for the definition of a new product passes through verification and checking phases both in our fully equipped laboratory and on the rinks.

We designed two different product lines: Royal and RF. The different constructions allow us to satisfy the needs of all the skaters.

ROYAL CONSTRUCTION

The ROYAL Line is designed with a CUT LINE that has no interruptions (fig. 1).

Due to the specific design choice the collar part wraps the ankle (fig. 2) and in combination with the tongue that is well padded and strong (fig. 3) gives the skater the feeling to have a homogeneous support with a 360° responsiveness.

RF CONSTRUCTION

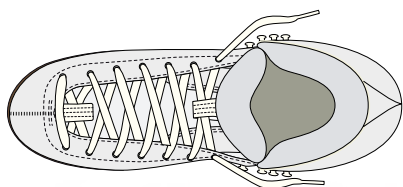

The RF line has a CUT LINE divided in two parts with a "V" cut that allows the upper to bend (fig. 1).

Due to the specific design choice the collar part completely wraps the ankle (fig. 2); the tongue is specifically studied to support and bend at the same time (fig. 3 and fig. 4) since this line is designed to allow the skater to have a deep movement forward and backward with a strong lateral support feeling.

ROYAL LINE VS RF LINE

ROYAL CONSTRUCTION

RF CONSTRUCTION

#embracethechallenge

The emblem of years of Risport tradition has been redesigned! The new RF 1 ELITE, with the highest quality leather, is made for those figure skating at a professional and competitive level.

Jumps

The **new sole** is composed by a multilayer of materials (high-density PE, and carbon fiber). This combines resistance and lightness; the full skate is more reactive and easier to control.

New RF1 ELITE

Old RF1 ELITE

New RF 1 Elite is lower in the back, and deeper. It has the same design of the RF3 Pro but with a **90 stiffness**, it is the ideal model for all those skaters that like the RF3 PRO but need more support.

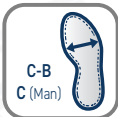

The mix created by the upturned microfiber lining and the collar support gives flexibility, and the higher padding maximizes the **comfort** perceived by the athlete in executing the most complex elements. The new lace holder keeps the tongue fixed and extra hooks allow for a stronger lacing of the boot.

Royal Prime is the answer to all high-level athletes' needs, to guarantee them the best performance. It proudly reflects the aesthetic lines of the Royal model that has graced the winners' podiums at the World Championships and the Olympics.

Width

Size

Support-Stiffness

Jumps

Royal Prime is made with **light and high technological materials**.

The **leather sole** with special **angled** processing enables skaters to reach very high lateral inclinations; on the other side, leather has the ability to stop vibrations and ensure perfect control.

It is padded with a technical elastic microfiber to ensure maximum range of motion to the skaters without sacrificing comfort. This area works together with the padded tongue to create a unique support all around the ankle.

The **new RF 3 PRO** is designed to give all the features of the RF 1 ELITE model to young professionals: it supports their professional and physical growth, offering exceptional comfort and high-level performance.

Width

Size

Support-Stiffness

Jumps

The **advanced lining** provides maximum stability and control, enhanced with antibacterial and anti-inflammatory properties due to aloe treatment.

The **leather sole** with special **angled** processing enables skaters to reach very high lateral inclinations; on the other side, leather has the ability to stop vibrations and ensure perfect control

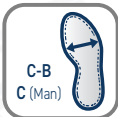

The mix created by the upturned microfiber lining and the collared support's flexibility and higher padding maximizes the **comfort** perceived by the athlete in executing the most complex elements. The reinforced eyelets, holes, and hooks create a **multi-adjustable lacing system**, allowing for stable and personalized lacing at different points of the foot and ankle.

Crafted specifically for young professionals who demand excellence on the ice. This skate seamlessly blends design, comfort, performance, and elegance while maintaining an extraordinary lightness, true to the Risport tradition with its iconic leather sole.

Width

Size

Support-Stiffness

Jumps

The **unique lining** offers the highest quality and technical value, providing cushioning in high-stress areas like the ankles. It ensures optimal breathability, maintaining the correct foot temperature and preventing bacterial growth.

The **special angled sole**, allows skaters to achieve high lateral inclinations. It is made with **leather material** that reduces vibrations, offering perfect control and stability.

The collar guarantees very high levels of comfort for the athlete. Enhanced with reinforced eyelets, holes, and hooks, this lacing system allows multi-adjustable lacing across different points of the foot and ankle, ensuring a personalized fit.

Electra is the perfect boot for those who want to refine their figures and single/double jumps without sacrificing elegance and comfort.

Width

Size

Support-Stiffness

Jumps

This model is completely revamped from the upper to the sole! The main innovations for this high-demand boot are:

The same brilliant **microfiber** used in the Royal Prime, ensuring superior performance and a modern look.

An elegant and innovative **thermoplastic sole** that offers durability and lightness at the same time.

The **new technical fabric** lining guarantees comfort and great control of the skate.

New design that combines elegance and excellent functionality.

Available in 2 blade sets with Aspirational blade and Mk Flight.

The back of the boot and the ankle area have been redesigned for greater comfort.

Totally renewed in design and structure, we are proud to present the new Antares designed to guarantee comfort and performance for all young skaters and for amateurs who want to get serious.

Width

Size

Support-Stiffness

Jumps

Antares is specially designed for single jumps and figures and its main features are: **leather upper** with handcrafted details that make the design of this skate elegant and minimalist; **thermoplastic sole** in the new brilliant color embellished with the gold emblematic logo; **new exceptional lining** that due to its open weave structure guarantees breathability and comfort; the possibility of **thermoforming** the shoe to adapt perfectly to the foot.

Available in 3 blade sets with Jackson Ultima Mark II, Risport Aspirational and Mk Flight.

Comfort is ensured by the special width designed for feet that are not yet fully formed, the new **padded collar** and the lacing system, made with reinforced eyelets, holes and hooks that allows multi-adjustable lacing at different points of the foot and ankle.

The Risport entry-level model is designed for skaters at the beginning of their training journey, aiming to improve their technique daily with aspirations of reaching the Olympics.

Width

Size

Support-Stiffness

Jumps

Main features are:
Upper made from ultralight, durable material,
extreme comfort ensured by the breathable
lining and ease of lacing;
The thermoplastic sole with ergonomic design
for lightness and stability.

Available in 2 blade sets with Recreational blade and Jackson Ultima Mark II.

The collar structure assures a great comfort during the skating.

#embracethechallenge

The Dance Prime is a cutting-edge skate designed for high-level athletes, aimed at providing top performance.

Width

24

A stylized logo of a figure skater in blue.

It is made with lightweight, high-tech microfibre. It reflects the aesthetic of the renowned Dance model seen on World Championships and Olympics podiums. The exceptional lining guarantees maximum stability and control of the skate.

The **leather sole** enables skaters to reach very high lateral inclinations and has the ability to stop vibrations.

The **padding** ensured maximum range of motion to the skaters without sacrificing comfort. Together with the tongue it creates a unique support all around the ankle.

TURCHESE

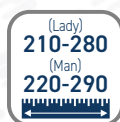

Medium-rigid support

Risport's entry-level model for dance is crafted with natural materials to provide excellent performance for beginner dance and group athletes.

Width

Size

Support-Stiffness

Jumps

It is designed for dance and group athletes who are beginning to approach the specialty professionally.

It includes a **leather sole** with special angled processing, allowing high lateral inclinations and excellent shock absorption. It is also a thermoformable shoe for a customized fit.

The upturned **lining** on the upper along with greater padding guarantees very high levels of comfort for the athlete. Lower cuff for optimal ankle mobility.

#embracethechallenge

Mercurio is Risport's premier model for professional roller skaters and high-level athletes, specifically designed for performing triple and double jumps. It combines cutting-edge design and technical innovations to maximize performance and lightness.

ROLLER

Its strengths are:

Pro Mount Sole with Air Flow System is an Innovative thermoplastic material which reduce vibration and weight. The Pro Mount Technology enhances stability while the air flow system guarantees air exchange and breathability.

The upper is a combination of microfiber and high-tech fabric for stability, strength, lightness, and breathability. It can be thermoformable for a customizable fit.

The mix created by the upturned microfiber lining and the collared support's flexibility and higher padding maximizes the comfort perceived by the athlete in executing the most complex elements.

Ambra is the latest creation from Risport: a skate that blends modern design with technical details. Crafted for high-level skaters focusing on double jumps.

Width

Size

Support-Stiffness

Jumps

Its main features are: **new upper** crafted with a design that combines comfort and performance, using innovative materials (microfiber) that ensure lightness and durability; the advanced design promotes heat dissipation, keeping the feet at an optimal temperature.

New bi-material sole crafted in PS and PU. Those materials guarantee lightness, stability and shock absorption, while the exclusive **Air Flow System** ensures constant air exchange and maximum breathability. It not only guarantees high performance, but its double color gives a unique look.

Breathable lining designed to provide extreme comfort. **New padded collar** completely redesigned to offer outstanding flexibility and exceptional comfort. It maintains the tongue design of all high-end models with its distinctive lace holder that keeps the tongue perfectly in place during use.

This model, completely revamped, offers the stability and comfort required for those who want to refine their figures and double and single jumps.

Width

Size

BOOT LACING

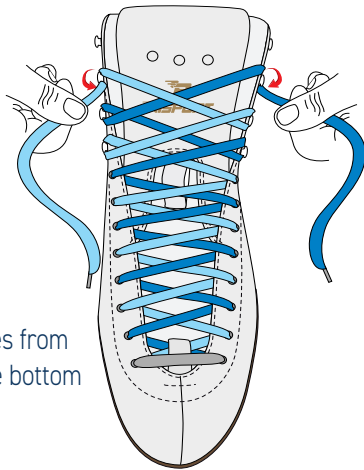

- 1 Start lacing your boots from the inside to the outside.

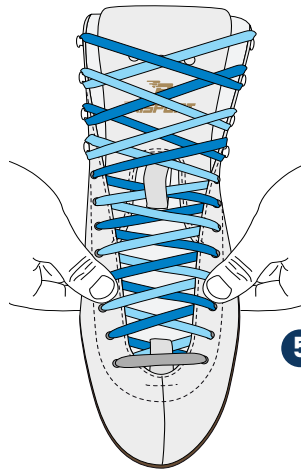

- 2 You should use the lace keeper.

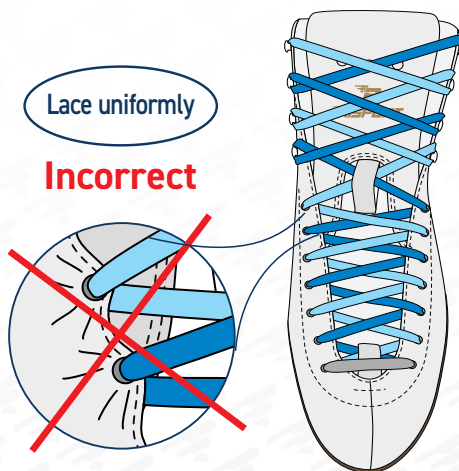

- 3 Put your feet inside the boots. Note the heel has to be in the right position.

- 4 Pass the laces from the top to the bottom of the hooks.

- 5 Risport softer lacing zone and a tight lacing will ensure you the best performance.

- 6 In the hook area lace tight but without too much pressure.

- 7 Unlace your boots in order to let it dry.
